

Tony Yu

331 Rio Verde • San Francisco, CA 94014 • yutony115@gmail.com • 415-917-6727

Education

University of California, Santa Cruz
Computer Science Game Design B.S.

Santa Cruz, CA
June 2026

Relevant Coursework: Computer Systems and C/Assembly Programming, Data Structures and Algorithms, UI/UX, Game Systems, Rapid Prototyping, Game Design Studio, Business of Games, Game Development Patterns

Projects

StrengthAI | Fitness App |

June 2026 – Present

- Identified that training complexity and decision fatigue drive user churn in fitness apps, and designed StrengthAI to surface clear, data-grounded insights instead of raw logs
- Architected the data model and fatigue-detection logic for an AI-powered strength training app, including guardrails to keep AI-generated insights accurate and non-speculative
- Integrated third-party exercise and LLM APIs with secure backend key management to generate personalized, data-backed training recommendations users can review and act on

Bubble Mage | Steam Game |

Jan 2026 – June 2026

- Designed level layouts and physics-based bubble traversal mechanics (bubble-riding, chained bounce-jumps) for an open-world exploration game built in C#
- Ran iterative playtesting cycles on combat and traversal, translating player feedback into balance changes to enemy difficulty and mechanic tuning
- Composed and produced original sound effects in Reaper and implemented the full audio library in-engine, covering combat, traversal, and environmental feedback

Experience

UCSC Athletics and Recreation Building Operations Attendant

Santa Cruz, CA
Sep 2024 - Jun 2026

- Oversaw day-to-day gym operations, including opening/closing procedures, equipment setup, and enforcement of safety and cleanliness standards
- Implemented streamlined equipment maintenance and inventory procedures, reducing downtime, and performed routine repairs and inspections
- Supported students, faculty, and staff with facility orientations, registration, and inquiries; recognized by management for customer service and problem-solving
- Contributed to campus-wide fitness events while ensuring compliance with university safety protocols

Boys & Girls Clubs Team Leader

San Francisco, CA
Sep 2019 - Jun 2021

- Led and directed a team of teen staff, assigning responsibilities and overseeing daily execution of programming
- Facilitated activities and programming for club members, adapting plans to keep sessions engaging and on schedule

Technical Skills: Python, C#, Unity, Pure Data, OSC, Reaper, GitHub, LLM/API Integration, Secure Backend Development, Audio Programming, Game Design, Level Design, Physics-Based Game Design

Product Skills: Problem Framing & Positioning, Data-Informed Feature Design, Cross-functional Technical Collaboration
